## Welcome to The Leader in Me

Every school year brings opportunities for academic growth as well as growth in all areas of development. Although children must be knowledgeable when they graduate, they must also be healthy, engaged, responsible, and caring people.

The Leader in Me provides your child with the vision and language to lead their school in a way that addresses all areas of development. As each child discovers and develops his or her unique gifts and talents, he or she is given opportunities to lead. As a leader, he or she becomes an active, engaged partner in his or her own education. You will see your child's self-confidence, responsibility, and initiative grow. Your child will quickly understand the benefits of different gifts and talents; will learn to listen to new ideas, will work together to achieve results, and will motivate others to be the best.

We hope your child enjoys sharing these new opportunities!
